

LEONEL HACHA SALAZAR

SENIOR BACKEND DEVELOPER | FULL STACK DEVELOPER

Node.js | TypeScript | NestJS | Angular | React | Java | Spring Boot | AWS | Microservices | Event-Driven
Espinar, Cusco, Peru | +51 959 034 122 | lionelsh.salazar@gmail.com | linkedin.com/in/leonel-hacha-salazar

PROFESSIONAL SUMMARY

Senior Developer with over **9 years of experience** building scalable and maintainable software solutions for the financial, retail, and automotive technology industries. Expert in backend development using **Node.js, TypeScript, NestJS, Java, and Spring Boot/WebFlux**, complemented by modern frontend development with **Angular and React**. Specialized in **Serverless, Event-Driven, and Hexagonal architectures** on **AWS**, REST/GraphQL/SOAP API integration, SQL/NoSQL databases, and container deployment with **Docker/Kubernetes**. Prioritizes code quality through **Clean Code, DDD, automated testing**, distributed observability, and CI/CD automation in international environments.

TECHNICAL SKILLS

LANGUAGES AND FRAMEWORKS

Node.js, TypeScript, NestJS, Angular, React, Vue.js, Java (15/17/21), Spring Boot, Spring WebFlux, RxJS, C# / .NET Core, RESTful APIs, GraphQL, SOAP, OpenAPI / Swagger.

CLOUD AND DISTRIBUTED SYSTEMS

AWS (Lambda, SQS, DynamoDB, Step Functions, S3, API Gateway, EKS), Microservices, Serverless, Event-Driven Architecture (EDA), Hexagonal Architecture, Docker, Kubernetes, GitLab CI/CD, GitHub Actions.

DATABASES, QUALITY AND OBSERVABILITY

PostgreSQL, DynamoDB, MongoDB, Redis, MySQL, TypeORM, Prisma, JPA / Hibernate, Jest, JUnit, TestContainers, Mockito, New Relic, Prometheus, Grafana, CloudWatch, Clean Code, Domain-Driven Design (DDD), Design Patterns.

AI-ASSISTED DEVELOPMENT

Advanced use of tools (*GitHub Copilot, Claude, ChatGPT, Cursor*) for legacy code refactoring, vulnerability analysis (OWASP), unit/integration test automation, and technical documentation generation (OpenAPI, C4).

PROFESSIONAL EXPERIENCE

Backend Developer

Mar 2024 - Aug 2026

Baufest | Client: Qik Banco Digital Dominicano S.A. | Digital Banking / Fintech

- Financial Products Architecture:** Designed and evolved backend services for 5 financial product lines (Certificates of Deposit and credit card, life, home, and loan insurance) within a digital banking ecosystem, applying Hexagonal Architecture and DDD patterns.
- Critical Integrations & Onboarding:** Developed REST/GraphQL APIs and microservices for card, user, and account transaction management; integrated biometrics and liveness detection services (Onfido Studio), risk/fraud signal validation (LexisNexis Risk Solutions), and communication with the Temenos Transact core banking system.
- Financial Lifecycle & Cloud Architecture:** Implemented 6 critical operations of the financial lifecycle (opening, early closure, termination, blocking, unblocking, and automatic renewal) with real-time data synchronization and notifications, over an AWS Serverless and Event-Driven architecture (Lambda, SQS, Step Functions, DynamoDB).
- Quality, Operations & CI/CD:** Ensured system resilience and maintainability through unit testing with Jest, distributed monitoring with AWS CloudWatch, and continuous deployment with GitLab CI/CD pipelines, participating in *code reviews* and production incident support.

TECHNOLOGIES: Node.js, TypeScript, NestJS, PostgreSQL, TypeORM, Prisma, Redis, REST, GraphQL, Temenos Transact, AWS (Lambda, SQS, DynamoDB, RDS, S3, API Gateway, Step Functions, CloudWatch), Docker, Jest, GitLab CI/CD, Scrum.

Backend Developer

Feb 2022 - Aug 2023

Baufest | Client: Cencosud - Delivery as a Service (DaaS) | Retail / Logistics

- Logistics Core & Delivery Flows:** Designed, developed, and maintained backend components for 4 key operations of the DaaS (Delivery as a Service) platform: issuance, return, rescheduling, and real-time tracking of delivery orders.
- Resilient Logistics Operator Integration:** Integrated multiple logistics operators (Couriers) via REST/SOAP APIs, applying design patterns, retries, failure recovery, and state management to strengthen operational continuity and traceability.
- Reactive & Cloud-Native Services:** Built reactive services with Java/Spring WebFlux and Node.js/NestJS microservices with RxJS, deployed on distributed architectures on AWS and Kubernetes.
- Automation, Observability & DevOps:** Automated bulk generation and storage of dispatch labels using

Puppeteer and Amazon S3; incorporated testing, monitoring with Prometheus/Grafana, observability with New Relic, and GitLab CI/CD pipelines.

TECHNOLOGIES: Java 15, Spring Boot, Spring WebFlux, Node.js, TypeScript, NestJS, RxJS, PostgreSQL, TypeORM, REST, SOAP, AWS, Docker, Kubernetes, Gradle, Jest, Puppeteer, Prometheus, Grafana, New Relic, GitLab CI/CD, Scrumban.

Backend Developer

Aug 2021 - Dec 2021

Payqa Soluciones S.A.C. | Mobile Application / US Client

- **Serverless Cloud Architecture:** Designed and implemented microservices and serverless functions with NestJS, TypeScript, and AWS Lambda for the backend API of an international mobile application oriented toward real-time user interconnection and interaction.
- **Security, Identity & API Contracts:** Integrated Auth0, MongoDB/TypeORM, and Swagger/OpenAPI documentation, enhancing authentication, persistence, and maintainability.
- **Quality & Continuous Integration:** Configured continuous integration pipelines in GoCD, applying modular architecture principles and design patterns to ensure decoupled, maintainable code with high test coverage.

TECHNOLOGIES: Node.js, TypeScript, NestJS, TypeORM, MongoDB, AWS (Lambda, API Gateway), Auth0, REST, Swagger/OpenAPI, Java, Spring Boot, GoCD.

Full Stack Developer

Jun 2021 - Jul 2021

Autosense International - California, USA | Automotive Technology / IoT

- **Automotive Data Processing:** Designed and developed an *end-to-end* solution for the automated ingestion, transformation, and structuring of telemetry data and logs from vehicle breathalyzer devices, turning raw information into executive reports.
- **Monorepo Full Stack Architecture:** Built the web application within an Nx monorepo ecosystem, integrating a reactive frontend in Angular (RxJS) and a modular backend in NestJS/TypeORM on MySQL.
- **Report Automation & DevOps:** Implemented a dynamic PDF report generation engine using Puppeteer and configured the CI/CD workflow with GitHub Actions, automating deployment to VPS servers using Nginx as a reverse proxy.

TECHNOLOGIES: Node.js, TypeScript, NestJS, Angular, Nx, RxJS, TypeORM, MySQL, REST, Puppeteer, GitHub Actions, Nginx, VPS.

Full Stack Developer

Feb 2020 - Jun 2021

RECOMSAC E.I.R.L. | Educational Technology / EdTech

- **Comprehensive EdTech Platform:** Designed and implemented a school management web platform composed of 5 core modules: attendance tracking, grade recording, course administration, user management, and academic management.
- **Full Stack Ecosystem & Persistence:** Developed modular REST APIs with NestJS and TypeScript connected to a dynamic Angular frontend (Nx monorepo architecture), modeling optimized relational schemas in MySQL using TypeORM.
- **Report Generation & Deployment:** Automated the issuance of report cards, certificates, and official academic reports with Puppeteer, and configured continuous delivery using GitHub Actions for deployments to Nginx-optimized VPS servers.

TECHNOLOGIES: Node.js, TypeScript, NestJS, Angular, Nx, RxJS, TypeORM, MySQL, REST, Puppeteer, GitHub Actions, Nginx, VPS.

Computer Systems Programmer

Jan 2016 - Aug 2019

Alpha Ingenieros E.I.R.L. | Enterprise Software / ERP & Point of Sale

- **Enterprise Software Development:** Developed and implemented custom solutions across 4 business domains: electronic invoicing, point of sale (POS), e-commerce, and restaurant management, using C#, .NET Core, PHP (Laravel), and JavaScript.
- **Databases & Legacy Maintenance:** Designed relational schemas, stored procedures, triggers, and complex queries in SQL Server and MySQL; additionally maintained and evolved critical legacy systems in Visual FoxPro and Delphi.

TECHNOLOGIES: C#, .NET Framework, .NET Core, WinForms, Visual FoxPro, Delphi, PHP, Laravel, SQL Server, MySQL, JavaScript, HTML, CSS, jQuery, Git, Nginx, Apache.

EDUCATION AND PROFESSIONAL DEVELOPMENT

EDUCATION	Systems Institute - National University of San Antonio Abad of Cusco
VOCATIONAL TRAINING	SENATI - National Service for Industrial Work Training
LANGUAGES	Spanish Quechua (Native) English (Intermediate)
COMPETENCIES	Problem solving, analytical thinking, effective communication, teamwork, adaptability, autonomy, and continuous learning.
